

With its eye-catching visual design, which includes seals as a design element, it makes any electronic components look good.

ALUBOS enclosures are available with profiles which are closed, divided horizontally, and open on one side. The lengths of all profile types are so variable that the result is a universal, ergonomic, individual hand-held

functions even in the standard design.

An overview of the enclosure sizes and the available lid and profile designs can be found on pages 536-537.

Enclosure material: Aluminium extru-

sion Al Mg Si 0.5, powder-coated, aluminium diecast lid GD-Al Si 12, powder-coated. For technical data see pages 646-655.

Colour: Black, similar to RAL 9005.

> Special colours and minimum order quantities on

request.

Ingress protection: IP 65 / DIN EN 60529

ALUBOS profiles

(except AB-AP...

IP 40).

Accessories (additional charge):

ABA ...: Axial adapter Parallel adapter AB-AP: DI: Coloured seals in:

red, similar to RAL 3000, rape yellow, similar to RAL 1021, green, similar to RAL 6000 or blue, similar to

RAL 5002 PU = 10 pcs

HS 2: Black handle profile available

on request

Coloured seals DI... to provide ingress protection IP 65 between the profile and the lid are available so you can create your individual design. The use of aluminium means that ALUBOS has very good EMC protection, which can be increased by the use of an EMC seal DI...EMV.

The EMC and the standard seals are suitable for a temperature range of -15°C to +50°C. V0 seals for temperature ranges from -30°C to +85°C are AB...HS: Handle

AB...MKL: Mounting clamp

DI...EMV: EMC seal, black, similar to

RAL 9005 PU = 10 pcs

AB...WLV: Wall brackets, adjustable

AB-WL: Wall brackets AB...GF: Rubber feet

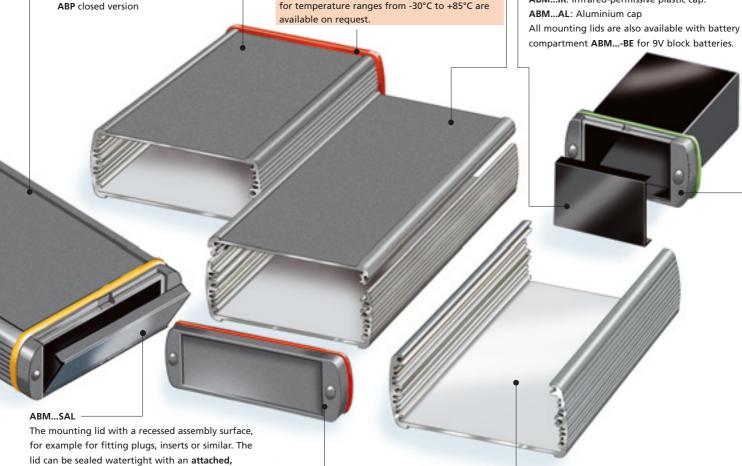

For universal docking station UDS,

see page 606.

ABPH: Version with horizontal split for fitting elements which protrude through the key surface. All profiles are fitted with grooves for the insertion of PCBs.

ABM...IR / ABM...AL: The mounting lids with a recessed assembly surface, for example for plugs, inserts or similar. These lids can be sealed watertight with a push-on cap.

ABM...IR: Infrared-permissive plastic cap.

ABM...AL

hinged aluminium flap.

The mounting lids with a recessed assembly surface, for example for plugs, inserts or similar. These lids can be sealed watertight with a push-on cap.

End lid with recessed surface for accommodating front membranes or membrane keypads.

Front panels in a wide range of materials, or preassembled PCBs, can be used as operating fronts.

ABPU Type open on one side.

Welcome to BOPLA City!

ALUBOS 820

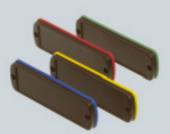

The robust aluminium enclosure is available with a width of 82 mm and a height of 22 mm, and with an additional type of ABPU profile (open on one side). This profile offers the following advantages:

- Front panels in a very wide range of materials can be used.
- Pre-assembled PCBs with a front membrane can be fitted directly as an operating front.

The profile with IP 40 ingress protection has additional slots to accept more PCBs or mounting plates.

The ABD 820 can be used as an end lid. For wall brackets for ALUBOS 820, see page 565. For illustrations of the system parts, see page 535.

Lid and seal variants

Front panels for ABPU (not illustrated)
The front panels for the ABPU profile are manufactured as standard from anodised

Front panels made of red-translucent or clear transparent plastic can be manufactured on request for the production of running light displays. In addition, preassembled PCBs with a front membrane can also be fitted directly as an operating front.

Welcome to BOPLA City!

ALUBOS 1680

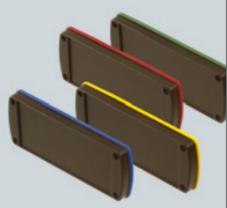

The robust aluminium enclosure is available with a width of 169 mm and a height of 82 mm, and with an additional type of ABPU profile (open on one side). This profile offers the following advantages:

- Front panels in a very wide range of materials can be used.
- Pre-assembled PCBs with a front membrane can be fitted directly as an operating front.

The profile with IP 40 ingress protection has additional slots to accept more PCBs or mounting plates.

The ABD 1680 can be used as an end lid. For wall brackets for ALUBOS 1680, see page 556. For illustrations of the system parts, see page 535.

Lid and seal variants

Front panels for ABPU (not illustrated)
The front panels for the ABPU profile are manufactured as standard from anodised aluminium.

Front panels made of red-translucent or clear transparent plastic can be manufactured on request for the production of running light displays. In addition, preassembled PCBs with a front membrane can also be fitted directly as an operating front.

ALUBOS accessories

The ALUBOS mounting clamps AB...MKL permit the fitting of ALUBOS enclosures AB 600, 800 and 1000 on a TS 35 DIN rail. Mounting clamp AB-MKL is used for vertical fitting on the DIN rail.

Handle AB 1600 HS / AB 2000 HS Handles AB 1600 HS and AB 2000 HS can be fitted on the side to the profiles. Because the handle swivels, in addition to its carrying function it can also be used to hold the enclosure at an angle (fixed locking position every 30°).

AB-MKL	84006300	ALUBOS 600/800/1000	

Scope of delivery: 1 mounting clamp

i illourithing clain

Material:

Spring steel, stainless, uncoated.

Note:

We recommend using two clamps for profile lengths of 150 mm and over. Mounting clamps AB 800 MKL, AB 1000 MKL and AB-MKL also permit direct wall fitting in addition to fitting on the DIN rail (see illustration). On request, the mounting clamps can also be supplied coated.

AB 1600 HS	84162000	ALUBOS 1600/1680
AB 2000 HS	84200000	ALUBOS 2070

Note:

An additional handle is available on request: handle (HS 2) for fitting to lids.

Handle HS 2 consists of two side parts (colour: black, similar to RAL 9005) and one profile (colour: anodised aluminium or black anodised aluminium).

The swivelling handle HS 2 (fixed locking position every 15°) can be used for carrying purposes or as an set-up handle for desktop use (see Accessories page 636).

ALUBOS accessories

By using the ALUBOS adapter you can combine operating and display screens in two ALUBOS enclosures.

The linked enclosures (45° angle) offer a wide range of uses as hand-held, desktop or wall enclosures.

You can benefit from the advantages of ALUBOS, such as sturdiness, EMC protection, easy assembly and easy fitting of membrane keypads.

ABA 800-1000

For an even wider range of applications, BOPLA offers the ALUBOS adapter. The ABA 800-1000 adapts an 800 profile to an 1000 profile.

Different lengths can be selected, creating a universal, ergonomic and unmistakable hand-held enclosure with your special design. Various lids and seals in the 800 and 1000 series are available to close the profiles.

The rubber feet have an adhesive layer, so they can be fitted anywhere on the membrane area on the ALUBOS profile. When fitted in the corners of the membrane area, the rubber feet can also be used for centring when stacking ALUBOS enclosures. Additional processing of the enclosure is not necessary.
